- The average price calculations above are based on a total consumption profile over a 12 Months-month period assuming 32.96% of the usage occurs during the Nighttime period.
- Your charges, per billing cycle, for this Fixed Rate Time of Use product are determined using the following formula: (Daytime kWh usage x (Infuse Energy Daytime Energy Charge + Oncor Daytime Energy Charge)) + Oncor Base Fee + Infuse Energy Base Fee. Note that any applicable Oncor charges are passed through at cost (with no mark-up).
- In the event ERCOT fails to provide complete interval data, Infuse Energy will estimate usage for missing periods using ERCOT backcasted profile data scaled to equal your kWh volume for the billing period. If the summed kWh interval usage data does not equal the total kWh usage for the billing period provided by Oncor, the interval data will be proportionately adjusted so the sum of all of the intervals equals the total kWh usage provided by Oncor.
